

PREFACE

The INTERNATIONAL CONFERENCE on Civil, Architectural and Environmental Sciences and Technologies (CAEST) 2019 was held at Samara, Russia, on November 19, 2019.

Conference aims to develop the scientific cooperation between Russian and foreign researchers in the field of architecture and construction technologies.

Forum also provides an interdisciplinary forum for researchers, practitioners and scholars to present and discuss the most recent innovations and developments in the field of new architecture technologies and construction methods, techniques and technologies of the automated engineering.

The three-day Conference brought together the specialists from different countries and organizations and provided an excellent opportunity to exchange knowledge, make oral contributions and poster presentations, and initiate discussions on the topics that are of interest to the Conference participants.

The selected papers of the Conference cover a wide range of information about building materials for new cities, construction mechanics and calculation theory of construction structures, the identity problems of urban environment, ways of heritage preservation and regeneration of historical city environment, explain and extend the concept of “Smart Cities”

The Conference was hosted by *Samara State Technical University*
