ERRATUM TO: [2019 JINST 14 C10003](#)

We would like to submit the following correction to the article:

- currently, in the published version of the article, a minus sign is missing in the argument of the exponential in equation (3.1). We would like to update the equation so that it looks like the following:

$$S(\lambda) = C(\lambda)V(\lambda) = C(\lambda) \int g_{\text{ff}}(Z_{\text{eff}}, T_e, \lambda) \frac{n_e^2 Z_{\text{eff}}}{\sqrt{k_b T_e}} \exp\left(-\frac{hc}{\lambda k_b T_e}\right) \frac{1}{\lambda^2} d\lambda.$$
