

## Hydraulics-2019

The conference "Hydraulics" is held annually in November since 2014 at the Bauman Moscow State Technical University. The Department of Fluid Mechanics, Hydraulic Machines and Hydraulic and Pneumatic Automation is the conference organizer. The best conference reports are published as articles in the journal "Hydraulics", indexed in the Russian Science Citation Index. Every year, representatives of various scientific, educational and industrial organizations of Russia and other countries come to us with reports and speeches. The main topics of the reports are hydromechanics, hydraulic machines, and hydraulic drives. A part of the reports is devoted to industrial ecology issues. We are pleased to see at our conference scientists from any countries and from any organizations devoting their work to industrial hydraulics, ecology and solving fundamental issues in these areas.

Sincerely, A. Protopopov
